**C**hange for the better! Over the last few years, the Department of Defense has undergone dramatic changes in how it buys goods and services. Many of these changes are based upon best commercial practices. Developing and aligning its acquisition, technology and logistics workforce while managing change in this new environment presents challenges now and in the future for DoD senior leaders.

- *Competing with industry for intellectual capital*
- *Orderly transition of the aging DoD acquisition, technology & logistics workforce*
- *Accelerating change through cross-functional enterprise teaming and rotational assignments*
- *Workforce reshaping (multi-functional and leadership development)*
- *Learning and growth (education and on-line training)*
- *Corporate university approach utilizing action learning*
- *Measuring performance through results*

Join us on September 12th for a live satellite broadcast that explores these and other challenges facing DoD's acquisition workforce. The broadcast, hosted by Stan Z. Soloway, Deputy Under Secretary of Defense for Acquisition Reform, includes panel discussions, showcases the Military Departments and Defense Agencies' best practices and success stories for managing change, building workforce skills and abilities, **and** highlights other strategies DoD will utilize to enhance its greatest asset— **PEOPLE PERFORMING THE MISSION.**

Studio audience, telephone call-ins. This "must-see" broadcast will lay out the DoD roadmap for managing continuous process improvement and change **and** developing a diverse workforce comprising the right people, who possess the right skills, in the right locations!
